Career Objective

A driven and detail-oriented BCA (Computer Science & Engineering) fresher with a strong foundation in **IP networking, network security, and VoIP protocols**. Equipped with practical knowledge of TCP/IP, OSI Model, DNS, SSH, Firewalls, and VPN — directly applicable to enterprise VoIP environments. Seeking a **VOIP Support Engineer** position to install, configure, and troubleshoot VoIP systems, support IP telephony infrastructure, and contribute to seamless business communications at **Zitatel**.

Key Competencies

- VoIP Systems & IP Telephony Concepts
- TCP/IP, OSI Model, IP Protocols
- LAN / WAN Fundamentals
- DNS, DHCP, HTTP/S, FTP, SSH
- Packet Analysis (Wireshark, tcpdump)
- Network Troubleshooting & Diagnostics
- Firewall, VPN, IDS/IPS Configuration
- Network Security & Monitoring
- Analytical & Problem-Solving Skills
- Strong Written & Verbal Communication

Technical Skills

Networking & VoIP	OSI Model, TCP/IP Stack, IP Addressing, MAC Address, Ports, HTTP, HTTPS, FTP, DNS, SSH, VoIP Protocols (SIP/RTP concepts), PBX Fundamentals
Network Security	Firewalls, VPN, IDS, IPS, OWASP Top 10, MITM Attack Analysis, DDoS Mitigation, Network Access Control
Diagnostic Tools	Wireshark, Nmap, Netcat, tcpdump, Ping, Traceroute
Operating Systems	Kali Linux, Windows
Soft Skills	Troubleshooting, Documentation, Team Collaboration, Communication

Relevant Coursework & Knowledge Areas

- Computer Networks — OSI/TCP-IP model, subnetting, routing & switching protocols
- VoIP Fundamentals — SIP, RTP, PSTN-to-IP integration, IP-PBX architecture
- Network Security — Firewall rules, VPN tunnels, IDS/IPS deployment, threat analysis
- Operating Systems — Linux administration, CLI-based configuration & scripting
- Ethical Hacking — Network reconnaissance, vulnerability scanning, packet inspection

Projects

Bank Management System github.com/Anirban7878/Bank_management_system

Tech Stack: C Language

A simple console-based **Bank Management System** built in C that simulates core banking operations through a menu-driven interface. The system allows users to:

- **Create Account** — Register a new bank account by entering the account holder's name and an initial deposit amount. Each account is assigned a unique account number automatically.
- **Deposit Money** — Add funds to an existing account. The user enters the account number and deposit amount; the system updates and confirms the new balance instantly.
- **Withdraw Money** — Safely withdraw funds from an account with real-time balance validation to prevent overdrafts. Displays an error if the withdrawal amount exceeds available balance.
- **Check Balance** — Look up the current balance of any account by entering the account number, giving users quick access to their financial status.

Demonstrates strong understanding of C programming concepts including structs, file handling concepts, loops, conditionals, and user input management.

Education

Techno Global University
Bachelor of Computer Applications (BCA) — Computer Science & Engineering

West Bengal, India
2024 – 2027 (Expected)

Ranibandh High School
Higher Secondary (HS) Examination — Science Stream

- Aggregate Score: **92%**

West Bengal, India
Passed: 2022

Certifications

Cyber Security & Ethical Hacking Training
Certificate ID: DCSC-PDJD0923

DROP Organization (DCSC)

Languages

Bengali Native **English** Professional Proficiency **Hindi** Conversational
